

instructions for use

horses & large animals

starting

- Begin with 4-6 bags, depending on stall size.
- Sprinkle water on bedding to help it start expanding.

cleaning

- Pick out wettest spots and mix damp bedding into drier areas.
- Will continue to expand bedding without it actually becoming wet.
- For best results, bedding should have a slightly moist feel.
- After a few days of usage you will begin finding the texture you prefer and what works best for your horse.

maintenance

- Add pellets as needed, according to preferred bed depth and how much is thrown away after picking.
- Sprinkle water as needed to maintain that "slightly moist feel."

cats

- Slowly wean your cat from old litter by adding a small layer of pellets underneath.
- Do this until pellets eventually replace old litter.
- Start fresh with 1" of pellets.
- Remove solids regularly & shake box to blend.

smaller pets

- Cover cage bottom with 1/2"-1" of pellets.
- Sprinkle water on bedding to help start expanding.
- Clean regularly; and never leave pets on a wet bed!

Use Dejno's Premium Pine Pellets as litter and bedding with your house pets. Whether it's the kitty-litter box or a small cage you'll be amazed at the odor and moisture control.

For shavings lovers, try combining Dejno's Pellets with Dejno's Wood Shavings for a great blend!
